## EDUCATION

---

### Rutgers University - Honors College

New Brunswick, NJ

B.S. Computer Science & B.S. Data Science

December 2027

**Awards:** **5x** Hackathon Winner, **2x** District STEM Showcase Gold Medalist, **2x** National CyberScholar, **3x** Dean's List, Rutgers SAS Excellence Award, CodePath Scholar, DTCC Rising Star, AP Scholar with Distinction

## WORK EXPERIENCE

---

### TD Bank | Customer Platforms Intern – Mobile & Digital Platforms - Mount Laurel, NJ

May 2026 - Aug 2026

- Designed in-app customer engagement guides for **250,000+** unactivated debit card users, partnering with developers to implement a new card status tag sourced from midtier APIs (Fiserv Corillian, Plaid, mParticle) and setting tags on events.
- Managed **feature flags** and product requirements by authoring Epics and User Stories in **Jira**, ensuring alignment with HCD guidelines via **Confluence** while collaborating with DevOps, QA, and Mobile Development teams.
- Diagnosed a **72%** drop in web users using **Amplitude**, presented findings to TD executives and external vendors.
- Analyzed **RESTful API** documentation (Swagger UI) for Transaction Enrichment Project, identifying missing JSON payload fields and coordinating with back-end engineers to align USTHA-to-TDODA data mappings.

### Apple Inc. | Specialist @ Apple – Freehold, NJ

Jul 2025 – Oct 2025

- Generated over **\$100,000** in revenue by providing tailored product solutions and technical guidance to customers.
- Diagnosed software/hardware issues and performed troubleshooting for Genius Bar appointments.

### Jetson | Product Intern

Jun 2023 – Aug 2023

- Contributed to feature rollouts increasing daily engagement by **5%** and day-one retention by **9%**.
- Prototyped product wireframes in **Figma** and **Swift** and executed QA testing for beta features.

## RESEARCH EXPERIENCE

---

### Aresty Research Assistant | Computational Robotics @ Rutgers PRACSYS Lab

Aug 2025 – Present

- Adapted **ILP** and **Heuristic** algorithms with **Gurobi** for 3D shelf placement on the **UR5** robot platform, achieving 10/10 object visibility and zero physical collisions in live hardware trials.
- Engineered a **Plotly** pipeline to map physical objects into simulation instances, and collaborated weekly with PhD researchers to prepare a presentation for the **22nd Annual Aresty Undergraduate Research Symposium**.

### MIT Lincoln Laboratory | BWSI ASIC Design Scholar @ Lexington, MA

Jul 2023 – Dec 2023

- Designed an **ASIC** chip for air quality monitoring using **Chipyard** and mentored as a **Teaching Assistant** during Fall.
- Developed and pitched a **\$10,000** funding proposal to a panel of industry experts from SOFWERX.

## PROJECTS

---

### Epi-Sense (Wearable Seizure Detection) | ESP32, C++, Firebase, Swift

Hackathon Winner

- Developed a biometric wearable for real-time seizure detection with a custom cloud-integrated iOS & WatchOS app.

### Robotic Service Dog | Arduino, C, Ultrasonic Sensors, 3D Printing

STEM Showcase Gold Winner

- Engineered an autonomous service robot featuring a custom-programmed robotic hand and indoor navigation.

### NBA Player Longevity Model | Python, Scikit-learn, Pandas, XGBoost

Data 101 Capstone Project

- Trained a **Gradient Boosting** Classification model to forecast 5-year NBA player retention to achieve **91.45%** accuracy.

## SCHOOL LEADERSHIP & ACTIVITIES

---

### Rutgers Org. of Cloud Computing (ROCC) | Vice President

Jan 2026 – Present

- Presented technical workshops and hosted industry professionals for Q&A panels.

### Road to Silicon V/Alley (RSVP) | Cohort 7 Member

Nov 2025 – Present

- Selected for a highly competitive cohort, leveraging frequent networking opportunities with diverse C-suite executives.
- Grand Winner of Rutgers Engineering Innovation Relay + Honorable Mention at TechStart 2026

## TECHNICAL SKILLS & COURSEWORK

---

**Relevant Coursework:** Data Structures, Computer Architecture, Linear Algebra, Data 101, Discrete Structures

**Languages:** Python, Java, C, C++, Swift, SQL, JavaScript, GML

**Frameworks:** React, SwiftUI, UIKit, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn, XGBoost

**Hardware/Embedded:** Arduino, Raspberry Pi, ESP32, FPGA, Bluetooth, IoT, I2C/SPI, Soldering, CAD, EasyEDA

**Developer Tools:** Git, Xcode, Android Studio, Jupyter Notebook, Jira, Confluence, Figma, Amplitude, AWS, JUnit, GDB
